#### Fisheries Management Act 1998

#### The National Beche-de-mer Fishery Management Plan

I, **Honorable Andrew Baing M.P** Minister for Fisheries by virtue of the powers conferred by Section 28 of the *Fisheries Management Act* 1998, and all other powers me enabling set out the revised national bêche-de-mer fishery management plan. This plan supersedes the previous plan and takes effect from the date of notification in the National Gazette.

#### **Background**

#### Description of the Fishery

The increasing demand for bêche-de-mer from Asian market and their over-exploitation in some of the neighboring Pacific Island Countries has caused the introduction of tough management regime to control the harvest of the fishery, but more importantly maintain resources sustainability.

In the past only a handful of beche-de-mer species were considered most valuable, but rapid declined in abundance of these group in the last 20 years has led the less favoured species being harvested increasingly. Today there are currently 20 different species being harvested commercially in PNG.

There has been a marked declined in the volume of high value species and an increase in the volume of the low value species taken. The opening of the market to new species that traditionally had no commercial value has dramatically impacted on the volume of export. Figures for 2000 showed PNG exported about 607mt valued about K16.2 million. Of that the low value species accounted for 61% (370mt) and high value species made up the remaining. In 2001 PNG exported 484mt value about K17.2 million and again the low value species accounted for more than 60% of the total export.

The price paid to fishers per unit (kina/kg) has also increased dramatically. Between 1980 and 1983, average beche-de-mer prices paid by buyers in PNG ranged from K2.34/kg to K3.36/kg; in 1985 they averaged K3.67/kg and K4.64/kg, in 1986. In 1994, prices paid to fishers in PNG were said to range from K1/kg to K12/kg, but sandfish were fetching from K12.19/kg in North Solomons Province to K18/kg in Manus Province, and white teat from North Solomons were selling for K30/kg (C grade) to K46/kg (A grade). The price paid by importers in 1994 ranged from K4/kg to K23/kg. In 2000, prices paid to fishers ranged from K3.50/kg for chalkfish to K60/kg for (A grade) sand fish; however, this increased to an average of K10/kg for chalkfish and K100/kg for A-grade sandfish in the 2001 season.

Despite its importance in terms of economics of PNG and cash income to some 200,000 fishers scattered in coastal villages, the fishery is not well studied. NFA is therefore envisaging conducting 2 to 3 provincial stock assessments annually. This will be done in partnership with reputable public or private institutions to conduct its research to update its information on growth, mortality, recruitment and movement patterns. These data are needed for estimate of yield and stock sizes required for the review of this plan.

Socio-economic studies pertaining to the impact of the fishery on the communities is being considered, once the results of the community studies currently conducted in Milne Bay Province (Trobriand Islands) by NRI in collaboration with Australia Maritime Collage is encouraging.

#### Environmental impacts

The bêche-de-mer trade has had environmental impacts. In areas where product is smoked, mangrove stands may be deforested as firewood is gathered. Estimates have been made that ten tonnes of wood is needed to smoke 1 tonne of bêche-de-mer.

Sea cucumber processing also results in the production of stickwater, which contains a toxin (holothurine) that originates from the boiling of holothurian skin. In other countries, the release of stickwater directly into the marine environment has resulted in fish kills in shallow coastal areas.

Other potential environmental impacts of bêche-de-mer harvesting are poorly understood. All sea cucumbers extract bacteria and organic matter from bottom sediments and some are responsible for bioperturbation and oxygenation of the sea floor. Consequently, intensive collection may cause changes to the condition and nature of seafloor sediments with unknown impacts on other resources.

#### 1. Interpretation

In this Management Plan, unless the contrary intention applies;

"Maximum sustainable yield" means the highest possible catch of beche-de-mer that may be taken from the management area with minimum effect on the ability of the stock to continue to replenish itself.

"Precautionary Approach" means setting down restrictions to control harvesting in absence of adequate scientific data. These restrictions include setting of TAC, seasonal and area closure and control fishing efforts.

"National Management Advisory Committee (NMAC)" means an advisory committee established under this plan to provide advice for NFA.

"Provincial Management Advisory Committee (PMAC)" means an advisory committee established in the province to provide advice to NFA or NMAC on provincial specific issues.

"Sustainability" means ability for a resource to maintain its stock at a fishable level given a level of effort or harvest.

"Total Allowable Catch (TAC) " means the set amount of catch that is allowed to be taken out of the fishery in any one year or season. The TAC is set at a safe level based on the average annual production or on stock assessment work.

"Traditional Management Practices" means methods for conservation of marine and coastal resources practiced by traditional indigenous inhabitants, that have been passed down from generation to generation and which are not usually formally recorded.

#### 2. Application

- a) This bêche-de-mer fishery management plan is cited as "the Management Plan".
- b) This Plan applies to all animals belonging to the Class Holothuroidea, commonly known as sea cucumbers, bêche-de-mer, pislama or trepang.
- c) This Plan applies to the bêche-de-mer fishery and includes all fishing and activities associated with the collection, processing, storage, buying, selling and exporting of bêche-de-mer products.
- d) The Schedules to this Plan form part of the Management Plan and shall be read together with the management.
- e) This Plan is to be interpreted in accordance with clause 1 of this Plan, Section 2, Interpretation, *Fisheries Management Act* 1998 and Part 1.1, Interpretation, *Fisheries Management Regulations 2000*.
- f) Otherwise express so words and expressions used in the management plan shall have same meanings as defined in the *Fisheries Management Act 1998* and *Fisheries Management Regulation 2000*.
- g) Where there is inconsistency between the Plan and Fisheries Management Act 1998 and Fisheries Management Regulation 2000 the Fisheries Management Act shall prevail.

#### 3. Objectives

- a) To manage the fishery to the maximum economic benefit of Papua New Guinea.
- b) To ensure that the development of the bêche-de-mer fishery benefits coastal communities, particularly customary fishers.
- c) To ensure use of the bêche-de-mer resource is sustainable and that bêche-de-mer fishing has minimal impact on the marine and coastal environment.

#### 4. Precautionary Approach

Consistent with relevant international instruments including most common principles of the precautionary approach developed pursuant to The FAO Code of Conduct for Responsible Fisheries 1982 and management objectives of the Authority, precautionary approaches of management shall apply in respect of the species specified in this Plan in the following manner;

- (a) In the absence of adequate scientific data, NFA shall take into account any uncertainties with respect to the size and productivity of the stock, to other management references points such as maximum sustainable yield, the level and distribution of fishing mortality, and the impact of fishing activities on associated and dependent species, and including climatic, oceanic, environmental and socioeconomic conditions.
- (b) In managing the beche-de-mer fishery, NFA shall consider the associated ecosystems on reefs within PNG. NFA shall develop data collection and research projects to assess the impact of fishing on non-target species and their environment, adopt plans as necessary to ensure the conservation of non target species and consider the protection of habitats of special concern.
- (c) The absence of adequate scientific information shall not be used as a reason for postponing or failing to take measures to protect the target and non-target species in each provincial beche-de-mer fishery.
- (d) The precautionary approach shall be based on the best scientific information available, including appropriate techniques and be aimed at setting stock specific minimum standards for conservation and management.
- (e) NFA shall, in collaboration with relevant persons and reputable organisations in PNG or the world, develop systems to collect data, and to undertake research into conservation of the stock and the protection of habitats.

#### 5. National Management Arrangements

- a) The bêche-de-mer fishery will be managed nationally. A National Management Advisory Committee (NMAC) will be formed in accordance with clause (g) to provide advice to the Managing Director on the management of the bêche-de-mer fishery.
- b) The NMAC will provide advice to the Managing Director on management measures as the Managing Director may specify, including total allowable catches, closed seasons, reporting, restrictions, trade, and any other relevant issues that the Managing Director may direct from time to time. The final decision on the fishery management remains with the Managing Director.
- c) The NMAC may take on responsibility for advising on management of other marine species if directed to do so by the Managing Director or the Board.
- d) The Managing Director or the Minister may direct the NMAC to examine a particular issue in the fishery or to review all or part of the management plan.
- e) The plan will be reviewed by the NMAC at the direction of the Managing Director at least every three (3) years or at such earlier time as the Managing Director shall direct.
- f) Subject to prior approval of the board, any review of the management plan shall be made public by the NMAC and comments will be invited from all stakeholders in the fishery.
- g) The National Management Advisory Committee will consist of the following persons, appointed by the Managing Director:
  - i. two National Fisheries Authority (NFA) representatives (one will be appointed Chair)
  - ii. one fishery scientist
  - iii. two customary fisher representatives
  - iv. two fishing industry representatives nominated by the fishing industry
  - v. a representative from a non-government organization whose objectives include conservation of the marine environment and resources and;
  - vi. one representative each from the Region Fisheries Secretariats for Southern, Momase and New Guinea Islands.

- h) No more than two members may represent groups or government from the same province.
- i) Elected political office holders are ineligible for membership of the NMAC. Should an NMAC member be elected to political office during their term he or she must resign their membership. Persons who nominate for provincial or national election shall stand down.
- j) The two representatives from NFA will serve as permanent members. Other members to the NMAC will serve for three-year terms. Representatives from Regional Secretariats will serve for one year and on rotational basis between provinces.
- k) The NMAC and its members will operate in accordance with the following procedures and such other procedures and standards as may be set by the Board:
  - i. a quorum requires two thirds of all members and must include one NFA representative;
  - ii. The Managing Director shall, with the endorsement of the Board lay down operational procedures for the NMAC, including place and dates for meeting and the NMAC shall meet at least once a year;
  - iii. prior to taking up membership, representatives will be required to disclose any direct or indirect personal or pecuniary interests in the fishery, otherwise than as a member of, and in common with the other members of, an incorporated company consisting of not less than 25 persons. The nature of his or her interest shall be disclosed as soon as possible to the NMAC. Such a disclosure shall be recorded in the minutes of the NMAC and submitted to the Managing Director;
  - iv. the NMAC and Managing Director must be advised of any substantive changes in such interests, or new such interests, during the course of membership. The Managing Director will determine if a change in interests will affect that member's term; and
  - v. where a member who has an interest described in subsection 5(k)(c), has not made a disclosure in accordance with that subsection, his or her vote shall be null and void retrospectively from the time such interest is considered and determined by the Managing Director and the Managing Director shall terminate the appointment of such a member.

#### 6. Provincial Management Arrangements

- a) To ensure strong input from the Provinces, NFA will encourage provinces in the formation of Provincial Management Advisory Committees (PMACs).
- b) PMACs will advise the NMAC on Province-specific management arrangements.
- c) NFA will only recognise PMACs that comprise broad representation of marine resource users in the Province and the membership of each PMAC must include:
  - i. one representative from Provincial Administration;
  - ii. one District Administrator;
  - iii. three customary fisher representatives (from different Local Level Government areas);
  - iv. two local fishing industry representatives;
  - v. one NFA representative;
  - vi. provincial fisheries officer; and
  - vii. one representative from a non-government organization whose objectives include conservation of the marine environment and resources.
- d) The PMAC may submit a request to the NMAC, with justification, for members representing other stakeholder groups in the Province.
- e) The PMAC and its members will operate in accordance with the following procedures and such other procedures and standards as may be set by the Board:
  - i. the Chair of the PMAC will be voted in by a two thirds majority;
  - ii. a quorum requires any six members and must include one customary fisher representative, the Chair and an NFA representative;
  - iii. the PMAC will meet as required, but, no less than twice a year.

- f) The Managing Director will determine, on the recommendation of the NMAC, if a PMAC will be represented on the NMAC. The composition of the PMAC will be the deciding factor. A PMAC must not include any elected political office holders from the national or Provincial Government or person nominated for such office.
- g) PMAC may be consulted on other fishery.
- h) The PMAC may in consultation with the Provincial Government develop a schedule to the National Bêche-de-mer Management Plan that covers province-specific management measures. The NMAC will endorse PMAC schedules for Board approval if they are consistent with the provisions of the management plan.

#### 7. Management Measures

The following management measures set out in the management plan shall have the force of law upon notification in the National Gazette.

# a) Licensing i. Licence Types

- a) Under this plan the only licences required in the bêche-de-mer fishery will be export and storage facility licences.
- b) There is no limit to the number of export licences in any given province. However the PMAC of each province may recommend to NFA a specific number of export licences for the province based on the resources available.
- c) Export licences are not transferable.
- d) Licences are valid for one year and subject to renewal.

#### ii. Licence Eligibility

- a) The bêche-de-mer fishery is reserved for the use of citizens of Papua New Guinea.
- b) Only PNG citizens and PNG citizen enterprises may hold an export licence, or engage in any part of the bêche-de-mer fishery.
- c) Storage and trade of beche-de-mer or/and beche-de-mer product are restricted to licensed operators only.

#### iii. Licence Requirement

- a) Licensed exporters will be required to provide returns (in the form on schedule 2) to NFA detailing all purchases made during the month. Failure to do so will result in export not being permitted.
- b) New or renewed export licensees will have to meet certain criteria set by the Managing Director with endorsement of the Board to qualify for an export license.
- c) Licences for the bêche-de-mer fishery will only be issued or renewed if the Board is satisfied that the company will meet, or has met, all licence conditions, and will comply, or has complied with the, provisions of the plan, *Fisheries Management Regulations* 2000 and the *Fisheries Management Act* 1998, including any that may have prevailed prior to this plan.

#### b) Total Allowable Catch (TAC)

#### i. TAC Allocation

- a) Each Province will have an individual total allowable catch (TAC), applicable to a twelve month period, that is calculated using the best information available.
- b) The TAC will be divided into two groups: high value species and low value species. Schedule 1 sets out which species belong to each group. These will be referred to as value groups.
- c) The Managing Director, with the endorsement of the Board, will set TACs for the bêche-de-mer fishery in each Province. The NMAC will advise the Managing Director on TACs using information provided by NFA. TACs will be set after the yearly closure of the fishery in each Province and prior to the opening of the fishery the following year.

TACs for each province will be recorded in Schedule 4 to this Plan and once set shall not be changed until the following year.

#### ii. Monitoring

- a) NFA will monitor the total allowable catch for each value group in each Province.
- b) The NMAC will review the TACs for each Province annually taking into consideration any new and relevant research or information that is available.
- c) NFA will close the fishery on a date it estimates the entire TAC, or TAC of a value group, will be reached. This will be based on the best estimates of weight traded during the season.

#### iii. Penalty

If the allocated TAC for a Province is reached and exceeded by a considerable amount (more than 5mt), that excess amount will be taken off the next season's TAC.

#### c) Export Requirements

- Licensed exporters will only export bêche-de-mer of the sizes set out in Schedule 1 to this management plan.
- ii) Export of frozen beche-de-mer shall be consistent with the standards set out under section 13.3 of the Fish Quality Control (Export) Standards
- iii) Trade of undersized bêche-de-mer is prohibited and any undersized product will be confiscated and the licence may be revoked or cancelled.
- iv) The export of part or parts of, or broken bêche-de-mer, is prohibited.
- v) Parts of, or broken bêche-de-mer, weighing more than 40 kilograms found on export premises or packed for export will be confiscated and the export licence held may be revoked.
- vi) Bêche-de-mer product for export must be packed by species and the holding container clearly labelled with the name and quantity of the product and the name and licence number of the exporter.
- vii) Movement of bêche-de-mer product between Provinces is not permitted except with written authorisation from the Managing Director of NFA.
- viii) Where an exporter's nearest port for export is in another province, or is not functional, the company may apply for written authorisation, from the Managing Director of NFA, to use another port for export. If granted, such written authorisation shall:
  - a) be attached to the licence;
  - b) apply for one year only; and
  - c) be reviewed at the time the licence is renewed.
- ix) Samples for export shall be limited to 2 pieces of each species at any one time. Samples bound for overseas for personal consumption shall be limited to 2kg per person.

#### d) Prohibitions

- Non-citizens shall not take part in any aspect of the bêche-de-mer fishery. (Refer to G57 National Gazette 4<sup>th</sup> April 2002)
- ii) The use of hookah and SCUBA for the fishing of sea cucumbers is prohibited. (Refer to G57 National Gazette 4th April 2002)
- iii) The use of underwater lights or surface lights for the fishing of sea cucumbers is prohibited. (Refer to G57 National Gazette 4th April 2002)
- iv) Collection, buying, selling of all species of beche-de-mer is prohibited during the closed season or when a TAC is reached.
- v) Storage and trade of beche-de-mer or/and beche-de-mer products are restricted to licensed holders only.

#### e) Closure of the fishery

- NFA will close the fishery when the TAC is reached or the compulsory season closure date is reached, whichever occurs first.
- ii) A compulsory closed season will occur each year, from **1 October** until **15 January** of the following year, inclusive. The compulsory closed season applies to all Provinces.
- iii) If a fishery in one Province is closed early, other Provinces may continue to fish until their TAC is reached, or the season closure date is reached, whichever occurs first.
- iv) All collection, buying and selling of all species of bêche-de-mer will cease at the beginning of a closed season declared by NFA. Exceptions for export may be granted in writing by the Managing Director of NFA and such exceptions may be with conditions deemed approved by the Managing Director.
- v) NFA will advertise the closure of the fishery through national and local media, as approved by the Board.
- vi) On the fishery closure date, exporters must report holdings of bêche-de-mer product to NFA on the form set out in Schedule 3.
- vii) NFA may specify a date by which all holdings of beche-de-mer must be exported, or impose other measures for holding of product during the closed season.
- viii) NFA reserves the right to close any area of the fishery for conservation or regeneration purposes if it is considered necessary to do so for the sustainable management of the fishery

#### f) Reporting

- i) Standard trade names must be used in all reporting. These are set out in Schedule 1 to the Plan.
- ii) Licensed exporters must submit holding data to NFA on all bêche-de-mer product handled. This includes species composition, grades, ward of origin, supplier's name, weight in kilograms and any other information that NFA may deem necessary. The Ward names as in Schedule 5 should be used.
- iii) Monthly holding reports containing the information set out in Clause 7(f)(ii) must be submitted by the fifth (5) day of the following month on the form in Schedule 2 to this Plan.
- iv) Exporters shall declare all beche-de-mer products they intend to export on the form as in Schedule 2 of this plan to NFA, before NFA will issue approval for export and shall submit to NFA detailed proof of remittance.
- v) Five (5) working days after the closure of the fishery, export licensees must submit a report to NFA stating how much bêche-de-mer they hold at the start date of the closure set in Clause 7(e)(i). These will be submitted in the form set out in Schedule 3 to the Plan.
- vi) Failure to submit the required reports within ten (10) days, or submitting incorrect data, including incorrect trade names, may result in suspension or cancellation of the export licence under Sections 19 and 20 of the *Fisheries Management Regulations 2000*.

#### 8. Specific Management Objectives

NFA will work with stakeholders in the bêche-de-mer fishery, non-government organisations and research institutions to carry out research and information-gathering activities to allow refinement of the Plan, particularly the conduct of resource surveys and assessments.

- a) Stock Assessment and Fisheries Management activities aim to;
  - i) Collect fishery data in a way that will test current assumptions of population abundance and productivity.
  - ii) Sample specific areas according to the agreed sampling protocols to enable the collection of a time series of fishery-dependent information, which can be examined to determine harvest impacts within these areas. If need be, NFA will commission, or encourage research to identify negative environmental impacts to the bêche-de-mer industry in PNG, and develop mitigation methods against them.
  - iii) Develop research and fishing protocols that will enable NFA and provinces to acquire the needed information for the fishery and aquaculture initiatives.

iv) Collaborate with any reputable institution to conduct abundance surveys and test harvest rates. Where necessary the information made be made available to Provincial Governments and other relevant organisations to establish local programmes of fishery statistics collection.

#### b) Aquaculture and Enhancement

NFA recognizes the aquaculture industry as a legitimate user of PNG aquatic resources and will provide access to brood stock for industry development purposes (growth and diversification), and by aquaculture licence on an as-needed basis, subject to conservation and environmental requirements. Request to access the wild stock for development purpose must be supported by detailed project proposal by the proponent.

#### 9. Customary Rights

- a) Existing customary management measures, which are consistent with this plan, are recognised by the NFA, and PMACs will be encouraged to notify NFA of such measures and incorporate these into their Provincial schedules.
- b) Customary open seasons that are inconsistent with closed seasons as set out in Clause 7(e)(i)&(ii) are prohibited under section 30 of the *Fisheries Management Act* 1998.

## SCHEDULE 1

## Value Groups, Trade Names and Minimum Size Restrictions

## Value Group H - High Grade Species

	Trade Name	Scientific Name	Alternative Names	Live Length (cm)	Dry Length (cm)
1	Sandfish	Holothuria scabra	Golden sandfish	22	10
2	Black teatfish	H. nobilis	Black mama	22	10
3	White teatfish	H. fuscogilva		35	15
4	Greenfish	Stichopus chloronotus		20	10
5	Prickly redfish	Thelenota ananas		25	15
6	Surf redfish	Actinopyga mauritiana	Rough surf	(20)	(8)
7	Blackfish	A. miliaris	Big blackfish	15	10
8	Curryfish	Stichopus hermanni		25	10
9	Stonefish	Actinopyga lecanora		15	10
10	Tigerfish	Bohadschia argus	Leopard fish	20	10
11	Brown sandfish	B. vitiensis	PK fish	20	10

### Value Group L - Low Grade Species

	Trade Name	Scientific Name	Alternative name	Live Length (cm)	Dry Length (cm)
1	Amber fish	Thelenota anax	Giant bêche- de-mer	20	10
2	Lollyfish	Holothuria atra	Biglolly	(30)	(15)
3	Chalk fish	Bohadschia similis	False teatfish	(25)	(7)
4	Elephant trunkfish	Holothuria fuscopuntata	Trunkfish	(45)	(15)
5	Pink fish	H. edulis	Smallbelly	(25)	(10)
6	Snake fish	H. coluber			
7	Flower fish	Pearsonothuria graeffei	lollyrough, butterfly fish		
8	Deepwater red fish	Actinopyga echinites		(25)	(15)

Note: Figures in the brackets are provisional estimates only. NFA endeavors to update this value once new information is made available.

## **Monthly Buying Summary Report**

This form should report all marine product bought within a month
